Emmanuel Ajanma, Technology Integrationist

January 2015

During your first year at Barre Technical Center (BTC) you have built a rapport with all of our faculty and staff, bringing a cheerful demeanor and service attitude wherever you go. In the rapidly changing world of educational technology you have made a priority of researching and studying technologies and strategies before recommending them to teachers, and educating them on the value to their programs. Your enthusiasm for the educational technology has further enhanced in the early stages of your coursework with Marlboro College.

You have worked successfully training instructors individually and in small groups. You have also supported teachers in delivery of OSHA 10 training, and directed groups of students in setup of school-based Google accounts, and trained a number of students in digital citizenship.

You have done well with updating technology inventory, and bringing needed information to assist in purchase priorities. In addition you have begun to address proper care of mobile carts and other technology.

Commendations: (Danielson Components Noted in Parentheses)

- Significant gains in knowledge of educational technology that can have a positive impact on BTC students, teachers, and programs (1d: demonstrating knowledge of resources).
- Developing and beginning to implement an introduction to digital citizenship (3c: engaging students in learning).
- Engaging with faculty and staff, quickly becoming a valued colleague (4d: participating in a professional community).
- Operating with integrity and in compliance with our district technology policies and procedures (4f: showing professionalism).

Recommendations:

- Expand on organized training of faculty and staff. Building current success into regular training opportunities (4d: participating in a professional community).
- Further develop and broaden the reach of digital citizenship training for students (3c: engaging students in learning).
- Continue to increase your knowledge and skills in the area of educational technology (4e: Growing and developing professionally).

Emmanuel, you have adapted well to the role of Technology Integrationist, bringing a desire to learn, and an ability to interact in a positive way with everyone you encounter. We look forward to having you continue to grow with us.
